"The material described in this shipping form was recovered and returned to the ITC site during an immediate response situation under the provisions of 40 CFR 270.1(c)(3), 40 CFR 263.30(b) and 30 TAC 335.93(b). The material was recovered at the offsite location specified on the top part of this form, was transported directly to ITC's site to be offloaded into tanks or containers, and has not been in the possessions or control of any party other than ITC. The material will be assessed and the required waste determination and characterization made at the ITC site in accordance with state and federal regulations. Once the immediate response ends, the on-site site management of any material that is or potentially is hazardous waste will occur in accordance with the permit exemption criteria set forth in 40 CFR 262.17(a)."
